

Materials 316L Stainless Steel
Pressure 3000 psi
Ports 1/8" or 1/4"
Filter Disc 2x FD.33.□

The STW106 series uses two stainless steel filter discs in one housing. A 'cyclone' effect is created as the sample enters the housing and proportion of it passes through the filters to the sample outlet port and the rest of the sample passes to the bypass port.

The housing design allows the filter discs to be changed without disconnection the port fittings.

Standard housings have NPT ports and include Viton seals. Other seal types are available as an option. BSPT and BSPP port types are also available.

The housings are free from welds and comply with NACE MR-01-75.

Notes

- (1) Above 390°F the pressure rating is reduced, consult us the exact rating at any specific temperature
- (2) Maximum temperature 390°F using standard seal
- (3) Material abbreviations, 316L SS = 316L Stainless Steel
- (4) Add suffix for other seal types, Chemraz = .C, Nitrile = N, Kalrez = .K, EPDM = .E, Silicone = .S, (e.g. STW106.221.E)
- (5) Replace the □ with the filter disc grade required, e.g. FD.33.S20V
